Megatrends

Snapshot from current global challenges

Growing global population

 more mouths to feed. The

 UN predicts 70% more demand in food production.

 Consumers are becoming more aware about products they buy.
 Investigating on provenance of products, meatless alternatives, organic food, etc.

 Desertification. The United Nations estimates that desertification affects 70% of arid lands, amounting to about 30% of the world's cultivable land.

Food supply chain is vulnerable. From singular events like Suez Canal obstruction and pandemic may have left over 250 million people with acute food shortages in 2020 (even 82% more than in 2019).

Soil degradation. Recent cultivation methods caused yield reductions of 25–50% in some regions of Europe and North America and between 40 and 90% in West African countries.

What is Indoor (Vertical) Farming?

Controlled Environment Agriculture (CEA)

TRADITIONAL FARM WATER USAGE: 250 L

MORE LAND, LESS YIELD

50% PLANTS TO BE HARVESTED

LESS FOOD MILES

LESS FERTILIZERS

VERTICAL FARM
WATER USAGE: 1 L

NO LAND, MORE YIELD

90% PLANTS WILL BE HARVESTED

MORE NUTRITIOUS

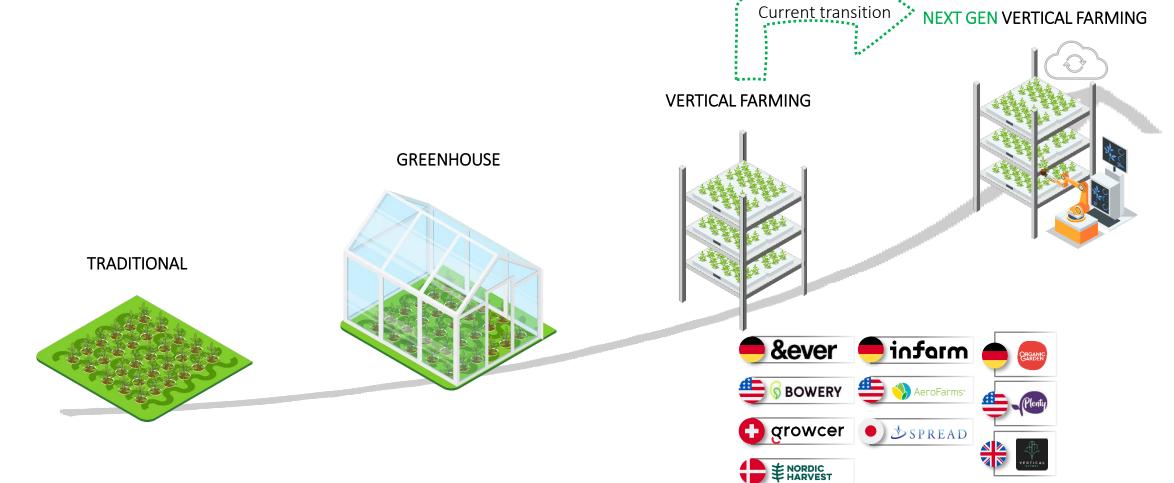

BUT USES MORE ENERGY

(R)Evolution of the farming

Future is now

Presentation title (optional) | Date (optional)

Indoor Farming and the Supply Chain

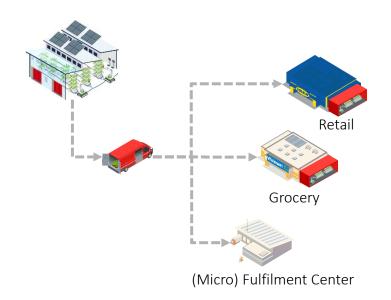

From Farming to Production, Distribution and Consumption

Farm / produce your own INGREDIENTS!

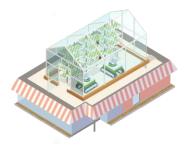

- Herbs for spice manufacturing
- Medicinal herbs for medicament manufacturing

Produce in the rural area (locally) and bring it to the urban area without HARVESTING!

Farm / produce your own HERBS for your recipes!

- Special herbs for salads (such as mustard) in the restaurant
- Herbs stored next to an "culinary mile"
